

# PATIENTS AMONG US

Eleven-year-old Brandon is a sickle cell patient and has required a blood transfusion as part of his treatment.

“Before Brandon got sick and needed blood, I never realized the importance of donating blood,” said Brandon’s father, Trevor. “I think that often, blood donors are underappreciated, so I’d like to say thank you for all you do to help my son.”

Because of the generosity of volunteer blood donors, blood was available when Brandon needed it.

*Many people say they have never donated blood simply because they have never been asked.*

*Please, Consider Yourself Asked.*

*The difference you’ll make in the life of a patient simply cannot be overstated.*
